

Student Health Services and Requirements

Although the district's primary responsibility is to educate students, the students' health and general welfare is also a major Board concern. The Board believes school programs should be conducted in a manner that protects and enhances student and employee health and is consistent with good health practices.

The district shall maintain a prevention oriented health services program which provides:

1. Emergency health care, including space separated from other students adequately equipped for providing first aid;
2. Communicable disease control, required by Oregon Department of Human Services, Health Services and the county health department;
3. Health records and health record information as required by Oregon statutes or rules;
4. Services for students who are medically fragile or have special health care needs;
5. Coordination with the health education program;
6. Vision and auditory screening;
7. Health counseling for students and parents when appropriate;
8. Assistance for students in taking prescription and/or nonprescription medication according to established district procedures.

The Board directs its district health staff to coordinate with health personnel from other public agencies in matters pertaining to health instruction or the general health of students and employees.

In accordance with the requirements of the No Child Left Behind Act of 2001, the district recognizes its responsibility to notify parents in advance of any nonemergency, invasive physical examination¹ or screening that is required as condition of attendance; administered and scheduled by the school in advance; and not necessary to protect the immediate health and safety of the student, or of other students.

¹The term "invasive physical examination," as defined by law, means any medical examination that involves the exposure of private body parts, or any act during such examination that includes incision, insertion, or injection into the body, but does not include a hearing, vision or scoliosis screening. The term does not include any physical examination or screening that is permitted or required by state law, including physical examinations or screenings that are permitted without parental notification.

Notification will be provided at least annually at the beginning of the school year or when enrolling students for the first time in school and will include the specific or approximate dates during the school year when such activities are scheduled or expected to be scheduled.

Procedures shall be developed and implemented to carry out this policy. All district employees will be appraised of their responsibilities in this area. Parents shall have the opportunity to request their students be exempt from participation in [scoliosis,] vision or hearing screening. The district will abide by those requests.

END OF POLICY
